Assistive Technology Dispensing Agreement for Early Intervention

The dispensing of assistive technology (ie: hearing aids) under Early Intervention as described in the parent guidebook, involves a set of unique expectations and procedures that are set forth by the New York State Department of Health Early Intervention Program. As such, and as a voluntary enrollment program, Hear 2 Learn has adopted this assistive technology agreement to inform families of our expectations for full participation that is in agreement with best practice standards in pediatric audiology.

By signing below, I confirm that I understand and agree to follow the expectations of the Hear 2 Learn Pediatric Audiology Services under Early Intervention.

I agree:

1. To arrive for each appointment on time and understand that if I am more than 20 minutes late for the scheduled appointment, the appointment may be canceled.
2. That consistent lateness, cancellations, or no-shows may result in a referral to another agency. We uphold a 2 appointment cancellation policy.
3. To maintain and care for all hearing devices as guided by the manufacturer’s instructions and those set forth by my audiologist.
4. To follow your audiologist’s instructions for wear, use, and care of hearing devices, including earmolds and accessories.
5. To bring concerns, problems, fitting issues, or questions to your audiologist as soon as possible.
6. To work together with my early intervention team to achieve full time use (all waking hours) of devices within one month of fitting appointment.
7. To schedule and keep all necessary follow up appointments related to the fitting of devices for my child. Further, I understand that fitting of devices for children involves specialized equipment, procedures, and follow up care that require frequent appointments within the first year of fitting.
